### *Performance Pump*

#### The Neptune (Dia-Pump)

Standard motor - TEFC: 1/3 HP -1ph-115 VAC-60c - totally enclosed fan cooled with built-in automatic thermal overload.

Ten turn micrometer dial calibrated in 1% increments.  
Bright color contrasted dial protected from corrosion by clear PVC covering.

Stroke mechanism moves only when adjustment is made.

Piston is powered through complete stroke length at all capacity adjustments eliminating stress, wear, and shock of lost motion designs.

Available individually or with a 30 gallon holding tank complete with a proportioning system to assure accurate mixes with water-soluble lubricants.

This pump also works extremely well with oil based lubricants. Pre-set pressure of 800psi.
